Bareilly, UP, India

## Summary

I am an experienced System Engineer with 1 year and 3 months of experience across Infosys Pvt. Ltd. Proficient in Next JS, React JS, JavaScript, Bootstrap, Material UI, HTML5, CSS3 and Responsive Design. Seeking new challenges, I am driven to solve real-world problems and contribute to my team's success. Constantly learning and staying up to date with industry trends., I actively engage with clients to ensure timely delivery and exceed expectations.

## WORK EXPERIENCE (1 year 3 months)

### Infosys, Bangalore – *system Engineer*

I have worked as a Front-end Developer, contributing to the UI aspect of the application using technologies such as ReactJS, Bootstrap, and Material UI. My responsibilities included ensuring responsiveness, implementing HTML5, CSS, and JavaScript. Additionally.

#### Roles & Responsibilities:

1. Redesigned the new certificate form module.
2. Recreated the feature of view certificate module.
3. Creating and enhancing the visual elements users interact with, including buttons, forms, and navigation menu.
4. Ensuring websites work seamlessly across various devices and screen sizes.
